Gabriel **Valenço**

Full-Stack Developer

gabrielvalencoofc@gmail.com github.com/gabrielvalenco linkedin.com/in/gabriel-valenço-480b43276 Brazil · Remote

PROFILE

Full-stack developer focused on digital products that deliver real value — SaaS, automation, high-performance landing pages and internal tools. I work from the database to deployment, and enjoy problems where front-end and back-end meet — dashboards, integrations and data pipelines. A background in paid traffic left me with the habit of measuring everything, which is now the filter I use to write software.

EXPERIENCE

One Moving · Senior Dev 2026 – present

React Native · React · Node · API · MySQL · AWS

- Responsible for the company's main system, from architecture to production releases.
- Development of integrated apps, connecting operations, clients and partners on a single platform.
- Technical leadership in the product evolution and definition of code standards.

Desigual · Full Stack Developer & Tech Lead 2025 – Jul 2026

React · Vue · Laravel · Node.js · MySQL · n8n · GSAP

- Technical leadership of digital products for clients across different industries.
- Architecture of full-stack solutions — front-end, API, database and automation aligned with the business.
- Quality standards, code review, continuous delivery and mentoring of junior devs.

Jem · Paid Traffic 2024 – 2025

Meta Ads · Google Ads · GA4 · Looker Studio

- Management of Meta Ads and Google Ads campaigns for B2C clients.
- Funnel analysis, creative optimization and reports driven by key metrics.

Grupo Prodemi · Full Stack Developer 2023 – 2024

Laravel · JavaScript · MySQL · Bootstrap

- Internal systems and integrations between the group's platforms.
- Maintenance and evolution of production applications, focused on stability and performance.

PROJECTS

Estante estante-pink.vercel.app

Next.js · TypeScript · PostgreSQL · Expo

A social reading diary in the style of Letterboxd, but for books — shelf, reviews, profiles, reading clubs and spoiler-free discussions. Also available as a mobile app.

Farol farol-5vre.vercel.app

Next.js · TypeScript · PostgreSQL · Upstash

Performance, SEO and accessibility analysis of websites in under a minute, with a 0 to 100 score and a visual report in Portuguese.

Golfo OEG golfo-oeg.com

React · Shadcn · PostgreSQL

Institutional platform and digital hub for Grupo Golfo OEG, focused on corporate communication and online presence.

Also: Pecuária pelo Clima · Rose Valenço · Dinâmico e Top · Terras de Santa Bárbara · Módulo One
